

HIMANSH SHARMA

AI/ML ENGINEER | SOFTWARE DEVELOPER

himanshsharma.me | himanshsharma046@gmail.com | +91 7678609018 | Faridabad, Haryana

PROFESSIONAL SUMMARY

B.Tech Computer Science software engineer with hands-on expertise in deploying machine learning pipelines, optimizing computer vision models (YOLOv8), and integrating LLMs for real-time applications. Proven track record of bridging advanced AI architectures with robust full-stack web development. Experienced in leading digital strategy for technical communities, driving measurable engagement through data-driven content and motion graphics.

TECHNICAL SKILLS

Programming & Databases: Python, C, C++, Java, SQL, MySQL

AI / ML & Computer Vision: TensorFlow, Scikit-learn, NumPy, OpenCV, DeepFace, YOLOv8

Generative AI & Speech: OpenAI APIs, RAG, LangChain, Llama 2, Whisper, Edge-TTS, Prompt Engineering

Web Development: React.js, Node.js, Express.js, PHP, JavaScript (ES6), Bootstrap 5, Tailwind CSS

Media & Video Production: Adobe Premiere Pro, DaVinci Resolve, Wondershare Filmora, Motion Graphics

Developer Tools: Git, Linux, Debian, IBM Cloud, AWS Foundations

EXPERIENCE

ASTRA AI

Feb 2026 – Jul 2026

AI / ML Intern

Hybrid

- Engineered object detection pipelines for U.N.C.L.E. Software, fine-tuning YOLOv8 models to identify traffic vulnerabilities and vulnerable road users with high precision.
- Processed and annotated datasets of 5,000+ images, optimizing inference speed by 20% and driving measurable improvements in real-time video stream evaluation metrics (mAP).
- Deployed practical AI/ML workflows within a structured software development lifecycle, utilizing OpenCV and TensorFlow for robust model testing.

GeeksforGeeks Student Chapter (IKGPTU)

May 2025 – May 2026

Media Team Co-Head

Kapurthala, PB

- Directed digital media and technical PR campaigns for university-scale tech symposiums (e.g., Success Varta), scaling organic social media engagement by 45%.
- Produced high-retention motion graphics and technical video assets using Premiere Pro and DaVinci Resolve, driving 500+ student registrations across 3 major campus hackathons.
- Led a creative team to establish comprehensive brand identities, executing content calendars that significantly boosted institutional visibility.

IBM / Edunet Foundation

Jul 2025 – Aug 2025

AI & Cloud Intern

Virtual

- Architected an AI conversational agent utilizing the IBM Granite foundation model, successfully deploying the solution on IBM Cloud architecture.
- Reduced simulated customer query resolution time by 35% through optimized natural language processing (NLP) pipelines and effective prompt engineering.
- Presented the finalized, scalable chatbot infrastructure to senior project leads, demonstrating cloud readiness and deployment efficiency.

PROJECTS

Aura – Voice-Based AI Companion

Tech: Python, Whisper, Llama 2, Edge-TTS, DeepFace, TensorFlow

- Developed a low-latency, multimodal AI assistant integrating Llama 2 and Whisper API for real-time speech-to-text processing.
- Implemented OpenCV and DeepFace for parallel facial-expression analysis, achieving context-aware emotional tracking with sub-200ms response times.

Examify – Online Examination Portal

Tech: PHP, JavaScript, MySQL, Tailwind CSS

- Engineered a scalable, full-stack examination portal in PHP and MySQL, supporting secure role-based access control (RBAC) for administrators and students.
- Automated result calculation and tracking workflows, driving a 70% increase in administrative processing efficiency for simulated academic data.

DOT SHIP – Logistics Management Platform

Tech: PHP, MongoDB, HTML5, CSS3, JavaScript

- Built a comprehensive logistics platform facilitating real-time tracking and database management, utilizing MongoDB for flexible schema design and rapid data retrieval.

EDUCATION

Punjab Technical University-Main Campus

B.Tech, Computer Science and Engineering

2024 – 2027

Jalandhar, Punjab

Government Polytechnic, Nilokheri

Diploma, Computer Science and Engineering

2021 – 2024

Karnal, Haryana

CERTIFICATIONS

Artificial Intelligence: GenAI, Prompt Engineering, RAG, LangChain, LLMs – IBM	Jul 2025
Cloud Fundamentals: Cloud, Deployment Models, IBM Cloud Services – IBM	Jul 2025
Machine Learning Foundations – Amazon Web Services	Feb 2024
Programming in C and Python – Delhi Institute of Computer Science	Jan 2023
